ABOUT PROVIDENCE

Providence offers a multitude of services including engineering, environmental consulting, disaster recovery, technology and software, architecture, surveying, placement, planning, and other support services. With its finger on the pulse of innovation, Providence is recognized for its high quality staff, superior client service, and professional integrity. Providence's values are aligned with its own definition: "the act of providing or preparing for future use or application; making ready." This preparation for the future implies growth, sustainability, and new opportunities- which our firm enthusiastically embraces.

Providence has considerable experience in all aspects of engineering, planning, regulatory analysis, permitting, modeling, monitoring, and compliance. Our engineers, environmental professionals, mitigation specialists, planners, and scientists possess decades of experience in solving complex engineering and environmental challenges and are trained in the latest technology and software available. Providence's success is a direct reflection of its emphasis on client relations, responsive and timely performance, strong project management, and a commitment to delivering quality deliverables.

Our firm has provided professional services to more than 1,000 clients in both the private and public sectors. Our client base is multinational and includes a wide range of industries as well as local, state, and federal agencies. At Providence our ecologists, geologists, biologists, toxicologist, and environmental regulatory specialists work closely with our engineers allowing us to offer an outstanding combination of talent and expertise to our clients.

Providence, an employee-owned company, began in 2000 offering environmental consulting services to industrial clients in the Baton Rouge area. The firm quickly expanded to offer all areas of environmental services and entered the public sector. In 2009, Providence spurred the growth of a disaster recovery division. Soon after, the firm significantly expanded its services into engineering design, surveying, and architecture. The next major growth milestone was expanding its air quality services, making Providence one of the only firms in the US to offer the full range of air quality services. With a tenacious appetite for growth, Providence continues to expand and diversify our service offerings.

SERVICES OF PROVIDENCE

ENVIRONMENTAL

Permitting & Compliance • Natural Resources & Wetlands • NEPA
Air Quality • Water Quality • Noise Services • Solid & Hazardous Waste
Site Evaluation & Remediation • Groundwater • Ambient Monitoring

ENGINEERING

Civil • Electrical • Utilities • Site Development
Facilities • Infrastructure & Transportation Design
Construction Engineering & Inspection

PLANNING

Community Development • Hazard Mitigation
Feasibility Studies • Urban Planning • Economic Development

DISASTER RECOVERY

Resiliency • Debris Monitoring & Management • Damage Assessments
Placement • Construction Management & Inspection

TECHNOLOGY & SOFTWARE

Optical Gas Imaging • BEEST Software Suite
Active & Intelligent Monitoring (AIM)

PLACEMENT

Disaster Response Services • Staff Augmentation

SURVEYING

Topographic • Land Title • Boundary • Route
Construction Layout • Mapping • Elevation Certificates

ARCHITECTURE

Modernization • Upgrades & Improvements • Alternative Building
Concepts & Systems • Wind Hardening & Flood Proofing

SUPPORT SERVICES

Expert Witness • GIS • Public Outreach • Training

THE PROVIDENCE COMMITMENT TO QUALITY

Quality service is imperative at Providence. We have adopted a Quality Assurance Program Policy and Procedure review process to ensure projects meet requirements and can be accomplished as proposed within the specified time frame.

Providence offers superior expertise and leadership, state-of-the-art technology, innovative solutions, and exceptional workmanship.

Quality is achieved by individuals performing work carefully and in conformance with project requirements and standard field/office procedures. Both the work originator and the person responsible for checking the work are identified. A series of reviews are made at various stages of design to determine if the work is being developed according to the project's requirements. Through the use of proactive communication and teamwork, cost escalations and overruns are minimized.

Providence has experienced significant growth over the years. We feel this reflects our commitment to providing quality services. For us, personal and professional integrity and competence are a must. It is a set of values reflected in our name, our vision, and our mission.

OUR CULTURE

Vision

Providing for the future...our clients, our employees, our communities.

Mission and Focus

Providence's mission is to focus on our clients' best interests now and into the future. This focus is sustained by employing the best people to provide the highest quality services, with innovation and integrity.

A PROMISE TO HEALTH AND SAFETY

Protecting the health, safety, and well-being of our employees and the community is a core value of Providence. We provide a safe workplace and our employees share the company's goal of ensuring operational safety and reliability. We believe all incidents and injuries are preventable and our safety policy stresses commitment to employee health and environmentally sound protocols. This policy also emphasizes procedures that provide a safe and protected working environment for employees, those who work on our behalf, and our neighbors. Providence is thus committed to operational excellence and a work environment that is incident and injury-free.

We appreciate the opportunity to present Providence's qualifications.
